Personal Statement

I am a curious guy essentially, an enthusiastic Frontend and Backend/mobile and web software developer with notable experience, looking to create solutions with great products, and expand my knowledge base in a practical and fast-paced work environment.

My main goal is to assume a role that allows me to take responsibility for the design of user products, with more focus directed towards user experience and interface design while further developing my digital skillset.

Highlighted Software Projects.

Wall-It - Java and Android platform, June 2020

[URL](#), [Source code](#)

Wall-It is an application that allows one to change the thematic appearance of one's phone.

- Implemented Unsplash's API to provide the app with a catalog of photos.
- Implemented the Realm database to store favorite photos.

WhatsApp2 - Java and Android platform, June 2020

[URL](#), [Source code](#)

WhatsApp2 is a clone of the popular chat application WhatsApp, and still maintains its base minimal features.
